We Believe the Maxwell is Greatest Motor Car Value on the Market

BUT our opinion would not be of any particular importance to you if it did not coincide with the facts. We only want you to look the market over carefully. Then we absolutely know that you will agree with us.

In the first place there is the remarkable Maxwell engine. No four cylinder motor of its size has more "pep" or go to it regardless of the price of the car it drives. It will climb hills on high gear in a manner that will astonish you. It is quiet and works day in and day out with a sound, business-like hum that is good to hear.

Any engineer will compliment the design of the chassis. And those who are not engineers cannot fail to note its simplicity and staunch construction. As for what it is made of, we can truthfully say that better material cannot be bought.

The operation of the car is simplicity itself—the brakes are powerful—the springs are long and flexible—the axles are strong and the steering apparatus, like the rest of the chassis, is built to stand the most severe service the car may ever have to face, wherever or however it is used.

Then if you consider looks important, and most people do, you will not find a more attractive car than the Maxwell at anywhere near the price.

And it comes to you fully equipped with all the attachments you will ever want or need; electric starter and lights, demountable rims, one man top, self-ventilating, rain-vision windshield, etc. All for \$655 (five passenger touring car) or \$635 (two passenger roadster).

We know you can't beat it.

Touring Car \$655

Roadster \$635
